

Ling Huang is an entrepreneur, senior consultant, and visionary with over thirty plus years of experience in the security and ICT industries and clients ranging from Mexican/American film studios to the Government of Canada. Currently the CEO of Technology North Corporation and co-lead to the Canadian National Autism Cantech! Project, his work focuses on the integration of business, inclusion programs, and technologies into a single social and technological infrastructure innovation to create a better world and quality of life for people like his autistic son and others dealing with disadvantageous circumstances.

He leads the talented TN team in creating the innovative and groundbreaking RoboCoach and Technology North Digital Services, a digital economy focused employment program that allows those living with Autism Spectrum Disorder (ASD) to thrive in today's world. TN's success stories has been featured on national and international media outlets, including CBC, Global TV, CityNews and CTV prime time news, PM Time, Toronto Star, Toggle, and Research Money.

Ling's presentation will detail the differential of RoboCoach and TNDS, how TN is planning to scale up the autism employment and adapt to other disadvantaged group and bring real benefit to citizen and public sector.
