Biography

Damon Mayes MSc., BSc., C.Stat (FRSS), P.Stat

Damon brings close to 30 years of experience as a senior leader in the healthcare and private industry sectors. He started his career at the University of Alberta as a medical researcher and graduate studies lecturer in the areas of biostatistics and clinical epidemiology. His work has been published in leading peer-reviewed journals, and as an invited visiting scholar, worked with international research teams applying advanced statistical methodologies to medical and public health problems. He then evolved his career working in leadership roles in both the healthcare delivery and post-secondary areas including hospital administration, long-term care/assisted living, health technology assessments (HTAs) and formal leadership roles in information technology.

For the past several years, Damon has worked as the Chief Operating Officer for the College of Registered Nurses of Alberta (CRNA). In this role, Damon uses his extensive board and executive leadership experience to support CRNA's Council and the organization in achieving its mandate and to help ensure the public receives safe, competent and highly professional healthcare services.

(Damon has an advanced B.Sc. degree in Mathematics, a M.Sc. in Statistics, is doctoral trained in biostatistics and has earned two chartered designations in Canada and the United Kingdom for the professional practice of analytics applied to optimizing business operations.)
